

DAGGER FLAT GP

This is a seven mile, in and out, road leading to a forest of giant Dagger Yuccas.

Survival Skills We Lost To Hi

Survival Skills Our Great-Grandfathers Had Most Of Us Have Forgotten

Watch Video

This road is usually passable by most vehicles, but rain may cause mud and make it difficult for lesser vehicles.

Dagger Yucca are abundant in the Dead Horse Mountains, but rare elsewhere in the park, preferring the limestone soil these mountains provide.

These tree-like succulents can reach 30 feet in height and 2 feet in diameter.

They generally bloom in late spring. There can be hundreds of creamy white flowers, each up to 4 inches long, on branched flower spikes. A bloom stalk with flowers can weigh up to 70 pounds.

There is a GPS - gpx track file at the bottom of the page.

Single Dagger Yucca

There is turnaround loop at the end of the road that is a good spot to get out and look around. Of course, you can also get out anywhere.

Small group of yuccas.

A forest of yuccas.
